

ABOUT ZONIX DISPLAY STANDS

From simple, compact mountings to complete multi-screen solutions, our display stands and brackets offer a choice of features and benefits matched to wide a range of uses, applications and budgets.

To help you choose the right configuration we've outlined some of the key product features configuration options.

PIVOT

All the mounts and stands in our range come equipped with one or more **Omni-mounts**, which attach to the rear of the display with the included mounting screws. The mount allows the display to pivot on the mounting point, providing basic movement and adjustment.

PAN

TILT

Omni-mount

The Omni-mount can also rotate on the mounting bracket or be positioned vertically when used on a mounting post

SWIVEL

An **extension arm** provides an additional range of movement and positioning options

Extension Arm

A combination of two arms (fixed or counterbalanced) provides extra flexibility and allows the screen to be adjusted back and forth as well as horizontally

Two Extension Arms

Counterbalanced arms provide finger-tip, vertical movement perfectly off-setting the weight of the display.

Counterbalanced Arm

Use individually or combine with a fixed extension arm to give the ultimate range of movement and adjustment

Click-together fixings mean simple and quick, no-tools assembly

Click fixing

Desk Mount – our most popular and adaptable fixing combines a 300mm post with C-clamp that can easily be attached to desk and worktop surfaces from 20mm to 60mm thick.

A neoprene under-gasket protects work surfaces

C-clamp

All of our display mounts are compatible with a range of alternative mounting options

Short-post/C-clamp

Wall fixing

Through-surface/grommet fixing

Cables are easily and tidily routed
